

PILATUS AIRCRAFT LTD. CH-6371 STANS, SWITZERLAND

SERVICE LETTER

**SUBJECT: CONVERSION FROM REFRIGERANT R-12 (FREON) TO REFRIGERANT R-134A
IN THE VAPOR-CYCLE COOLING SYSTEM**

All Operators:

Date: January 13/98

Due to the world-wide environmental concern with use of Refrigerant R-12 (FREON), PILATUS has developed a modification which introduces a more 'environmental-friendly' refrigerant (called R-134A) for the optional PC-12 vapor-cycle cooling system (Ref. AMM 21-50-00). The modification is available to all R-12 system-equipped aircraft as a "Factory Level Modification" performed through PILATUS AIRCRAFT LTD. in Stans, Switzerland, at the Operator's request.

Operators requiring further information on this subject, please contact the address given below:
