

PILATUS AIRCRAFT LTD. CH-6371 STANS, SWITZERLAND

SERVICE LETTER

SUBJECT: INTRODUCTION OF TYPICAL WIRING DIAGRAM MANUAL (TWM)

To all Customers, Air Authorities and Operators:

Date: Jan 15/01

This Service Letter is issued to draw attention to the following information:

Introduction of the new CD-ROM version of the Typical Wiring Diagram Manual (TWM)

Pilatus has developed a CD-ROM version of the TWM which is applicable to all PC-12 and PC-12/45 aircraft from MSN 101 up to and including MSN 400.

The original issue of the hard copy (paper) version of the typical Wiring Diagram Manual (WDM) will no longer be revised. The new TWM has been compiled from data available at the time of compilation. It has been prepared in accordance with Air Transportation Association 100 for Manufacturer's Technical Data.

Operators with a valid revision service for the hard copy (paper) version of the typical WDM will receive the new CD-ROM free of charge. For these Operators, the CD-ROM will be issued with this Service Letter.

A Pilatus documentation order form will accompany this Service Letter. Operators without a valid revision service can use the order form to request an issue of the new CD-ROM TWM.

The TWM does not include customized data, but provides sufficient information to permit trouble shooting for standard electrical/avionic systems.

The new TWM supersedes the original issue of the paper version of the typical WDM for aircraft MSN 101 thru MSN 170. However, it does not replace the customized WDM (paper format) which is delivered with each aircraft.

Delivery of customized WDM with each new aircraft will continue.

Operators requiring further information on this subject, please contact one of the addresses given below:
